

Powerful Antioxidant

With Zanthin® Natural Astaxanthin

FULL-SPECTRUM SOLUTION

- ✔ Supports joint tissue repair
- ✔ Improves joint comfort and lubrication
- ✔ Provides antioxidants to reduce oxidative stress
- ✔ Helps to regulate innate immune response

PRODUCT FEATURES

- ✔ Hydrolyzed eggshell membrane provides collagen and elastin, the building blocks for joint tissue
- ✔ An exclusive and proprietary form of fermented hyaluronic acid stimulates and supports natural joint repair processes, working in tandem with Zanthin® Natural Astaxanthin
- ✔ Zanthin® Natural Astaxanthin extracted to be the highest quality product via Deep Extract® solvent free supercritical CO₂ extraction

APPLICATIONS

- ✔ Capsules and tablets

FlexPro ES® is a natural solution for joint discomfort featuring Zanthin® Natural Astaxanthin, proprietary lower molecular weight hyaluronic acid and eggshell membrane. Valensa is a leading manufacturer of Natural Astaxanthin extract from *Haematococcus pluvialis* microalgae. Zanthin® Natural Astaxanthin the highest quality extraction with a unique, proprietary two-part process using all-natural Deep Extract® (high pressure) supercritical CO₂. Valensa's O2B® Peroxidation Blocker stabilization technology ensures long-term stability and efficacy for the consumer.

Proprietary low molecular weight hyaluronic acid manufactured exclusively for Valensa, works to stimulate the immune system and the production of synovial fluids responsible for the viscoelasticity and lubrication properties of the joint. This plays a role in maintaining an appropriate balance between potent pro-inflammatory and anti-inflammatory interleukins.

Eggshell membrane provides essentials for joint tissues: collagen for structural support and elastin to help tissues remain flexible.
