

## The next generation hair solution

- Clinically shown to regrow hair<sup>†</sup>
- Inhibits hair thinning<sup>†</sup>
- Reduces hair shedding<sup>†</sup>
- Keeps hair growing<sup>†</sup>
- Helps hair stay resilient<sup>†</sup>

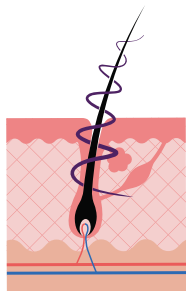

### 1 Regrowth requires hair balance and nutrition

Free fatty acids are the most abundant lipids in human hair and contribute to hair growth, structure, characteristics, and overall hair health.

### 2 Encourages health hair balance

Healthier hair occurs when there is a balance and not an excess of testosterone conversion to DHT by the enzyme 5 $\alpha$ -reductase.

### 3 Promotes regrowth

An effective and natural way to balance the hair cycle is with bioactive free fatty acids found in enriched lipidosterolic extract of saw palmetto from SEREVELLE.

### 4 Maintains longer growth phase

SEREVELLE has been scientifically shown to help maintain hair cycle balance and to maintain a longer hair growth phase, inhibiting hair thinning.

SEREVELLE™ is the natural solution for a clinically-effective hair regrowth approach through a patented extraction process and enrichment of bioactive fatty acids.

# SEREVELLE™

## The next generation hair solution

### Achieving Enriched Free Fatty Acids and Bioactive Free Fatty Acids in SEREVELLE™

**Bioactive fatty acids are the critical nutrient to nourish hair. SEREVELLE™ is enriched with more key bioactive fatty acids than the gold standard to deliver results!**

## SEREVELLE™

Valensa SEREVELLE has an optimized saw palmetto extract composition to deliver precisely the level and type of fatty acids needed. This fatty acid profile is achieved through ActiLipids4Hair™, a proprietary process, to naturally enrich the most bioactive fatty acids to deliver an unmatched profile of performance.

- **Powered by ActiLipids4Hair™, a patent-pending, proprietary process.**
- **Available in oil extract, soft gels, gummies, topical, and beverage powder mix.**
